

TABLE OF CONTENTS

COLD-FORMED STEEL SHEAR WALL DESIGN GUIDE	1
1.0 DISCUSSION	1
1.1 Summary	1
1.2 Introduction	1
1.3 Shear Wall Types.....	3
1.4 Sheathing Attachment to Framing.....	6
1.5 Chord Studs	6
1.6 Overturning Restraint and Shear Transfer	7
1.7 Deflection	8
1.8 Special Seismic Requirements	9
1.9 Seismic Design for Seismic Design Categories A Through C	12
1.10 General Procedure.....	12
1.11 Installation and Field Issues	13
2.0 SHEAR WALL DESIGN EXAMPLES	14
2.1 Example 1: Steel Sheet Sheathed, CFS Framed Type I Shear Wall for Wind (LRFD).....	16
2.2 Example 2: Wood Structural Panel, CFS Framed Type I Shear Wall for Low Seismic (ASD).....	19
2.3 Example 3: Steel Sheet Sheathed CFS Framed Type II Shear Wall for Low Seismic (LRFD).....	22
2.4 Example 4: Wood Structural Panel Sheathed CFS Framed Type I Shear Wall for High Seismic Per S400 (ASD)	27
2.5 Example 5: Steel Sheet Sheathed CFS Framed Type I Shear Wall for High Seismic per AISI S400 (LRFD).....	31
3.0 SHEAR WALL COMPONENT AND STORY DRIFT DESIGN EXAMPLES.....	34
3.1 Collector and Connector to Shear Wall Connections for Seismic Forces per AISI S400 (LRFD) (Refer to Example 5).....	34
3.2 Chord Studs, Overturning Restraint and Shear Transfer – Low Seismic (ASD) (Refer to Example 2).....	38
3.3 Chord Studs, Overturning Restraint and Shear Transfer for Type II Shear Wall (LRFD) (Refer to Example 3).....	41
3.3.1 Shear Transfer From 43-mil Wall Bottom Track to ¾-in. Wood Floor Sheathing (Use Lesser of APA and S100)	42
3.3.2 Shear Transfer for ¾-in. Wood Floor Sheathing to a 54-mil Rim Joist (Use Lesser of APA and AISI S100):	43
3.4 Shear Wall Design Deflection (Story Drift) (Refer to Section 2.4)	47
4.0 SHEAR WALL DESIGN EXAMPLE DETAILS	52
4.1 Details for Example 5 (Refer to Sections 2.5 and 3.1)	52
4.2 Elevation and Section View for Example 2 (Refer to Sections 2.2 and 3.2)	53
4.3 Details for Example 3 (Refer to Sections 2.3 and 3.3)	54
APPENDIX A: AISI SPECIFICATION, STANDARDS AND DESIGN GUIDES	56
