

Design Guide for Cold-Formed Steel Purlin Roof Framing Systems 2009 Edition

Table of Contents

CHAPTER 1 INTRODUCTION.....	5
CHAPTER 2 DESIGN METHODS FOR PURLINS.....	13
2.1 General.....	14
2.2 R-Factor Method for Purlins Supporting Through-Fastened Panel Systems with Uplift Loading.....	14
2.3 The Base Test Method for Standing Seam Panel Systems.....	15
CHAPTER 3 CONTINUOUS PURLIN DESIGN.....	27
3.1 Design Assumptions.....	28
3.2 Four Span Continuous Z-Purlins Attached to Standing Seam Panels Design Example (Gravity and Uplift Loads) -- ASD.....	31
3.3 Four Span Continuous C-Purlins Attached to Standing Seam Panels Design Example (Gravity and Uplift Loads) -- LRFD.....	42
CHAPTER 4 SYSTEM ANCHORAGE REQUIREMENTS.....	51
4.1 Introduction.....	52
4.2 Development of Design Provisions.....	53
4.2.1 Provisions of <i>Specification</i> Section D6.3.1 Anchorage of Bracing for Purlin Roof Systems Under Gravity Load with Top Flange Connected to Sheathing.....	53
4.2.2 Provisions of <i>Specification</i> Section D6.3.2 Alternate Lateral and Stability Bracing for Purlin Roof Systems.....	56
4.3 Applications of the <i>Specification</i> Provisions.....	57
4.3.1 Discrete Bracing.....	57
4.3.2 Torsional Bracing.....	59
4.4 Examples.....	59
4.4.1 Example 1: Single Bay Z-Purlin Attached to Through-Fastened Panels with One-Third Points Anchorage at Low Eave Purlin -- LRFD.....	60
4.4.2 Example 2: Single Bay Z-Purlin Attached to Through-Fastened Panels with One-Third Points Anchorage at Low and Ridge Purlins -- LRFD.....	64
4.4.3 Example 3: Four Span Continuous Z-Purlin Attached to Standing Seam Panels - ASD.....	66
4.4.4 Example 4: Three Span Continuous C-Purlins Supporting Standing Seam Panels - LRFD.....	72
4.4.5 Example 5: Cantilever Z-Purlin System - ASD.....	75
4.4.6 Example 6: Single Span Z-Purlin Attached to Through-Fastened Panels with One-Third Points Anchorage - ASD.....	79
4.5 Alternate Solution Procedures.....	86
4.5.1 Simplified Procedure.....	86
4.5.2 Matrix Based Solution.....	87
4.5.3 Example 7: Example 3 Using the Simplified Method and Matrix-Based Solution.....	88
4.5.4 Component Stiffness Method.....	90

CHAPTER 5 ALTERNATE ANALYSIS PROCEDURES.....	93
5.1 Component Stiffness Method	96
5.1.1 General Method	96
5.1.2 Stiffness of Components.....	104
5.1.3 Anchorage Effectiveness	109
5.1.4 Anchorage Configurations.....	110
5.1.5 Tests to Determine Stiffness of Components.....	115
5.1.6 Equation Summary	118
5.1.7 Z-Section Examples.....	129
Example 8: Anchorage Forces for Anti-Roll Anchorage Device	133
Example 9: Third Points Anchorage.....	142
Example 10: Supports Plus Third Point Torsional Bracing.....	148
Example 11: Supports Plus Third Point Lateral Anchorage	156
5.1.8 C-Section Example	168
5.2 Frame Element Stiffness Model.....	180
5.2.1 Source of Test Data.....	180
5.2.2 Selection of Computer Model.....	180
5.2.3 Development of Stiffness Model.....	181
5.2.3.1 Local and Global Axes	181
5.2.3.2 Modeling of Purlins.....	181
5.2.3.3 Modeling of Roof Sheathing	184
5.2.3.4 Modeling of Loads.....	185
5.2.3.5 Modeling of the Purlin-to-Sheathing Connection.....	186
5.2.3.6 Modeling of Anchorage Devices	186
5.3 Shell Finite Element Models to Predict Anchorage Forces.....	186
5.3.1 Components of Finite Element Model.....	186
5.3.1.1 Finite Element Representation of Purlin	187
5.3.1.2 Finite Element Representation of Sheathing.....	187
5.3.1.3 Link Connection Between Sheathing and Purlin.....	188
5.3.1.4 External Restraints	188
5.3.2 Model Loading.....	189
5.3.3 Finite Element Model Example	189
