

The top half of the page features a large, semi-transparent AISI logo in the upper right corner. Below it is a photograph of the Unisphere, a massive stainless steel globe sculpture in Queens, New York. The sculpture is composed of a complex network of intersecting metal rings and is surrounded by numerous water fountains that create a misty, blue-tinted atmosphere. The background shows a clear sky and some distant trees.

AISI

THE VOICE OF THE AMERICAN STEEL INDUSTRY

FOUNDED IN 1855 as the American Iron Association, today's American Iron and Steel Institute (AISI) history spans more than 160 years. AISI is proud of its history of advocating on behalf of the domestic steel industry. Never has it been more critical than it is today for our industry to speak out loud and clear and with a unified voice on major policy issues that are impacting American manufacturers.

American Iron and Steel Institute

Advocacy for America's Future

AISI'S MISSION is to influence public policy, educate, and shape public opinion in support of a strong, sustainable American steel industry committed to manufacturing products that meet society's needs.

We inform and educate opinion leaders about the American steel industry's strategic importance to national and economic security, communicate the benefits of steel and advocate for policy initiatives that support the industry.

AISI is actively engaged with Congress and the Administration to support and promote the priorities of the American steel industry.

AISI'S DYNAMIC TEAM works to advance legislative and regulatory initiatives that level the playing field for American steel, address global trade-distorting industrial policies, promote continued industry investments in sustainable steelmaking and ensure taxpayer dollars are used to procure cleaner American steel in federal infrastructure and clean energy projects — as part of a full slate of policy priorities that also include workforce safety, environment and sustainability.

Unparalleled Networking — Our Niche

AISI'S ANNUAL GENERAL MEETING

and other prominent steel events showcase the American steel industry's vital role in national policy debates and provide engagement between member companies and key opinion leaders. Cabinet members, senior White House staff, other high-ranking Administration officials, members of the U.S. House of Representatives and U.S. Senate, national security experts, prominent economists, political analysts, commentators and many others have addressed AISI member events. More importantly, AISI leadership is often invited to key White House and Administration meetings and events that will shape the future of our nation.

Growing Key Steel Markets

GREAT DESIGNS IN STEEL

AISI remains the source of record for American steel industry data.

Members receive access to statistical reports on steel production shipments and imports.

AISI'S MARKET PROGRAMS continue to advance the competitive use of steel through a market-driven strategy that promotes steel solutions to meet society's needs — primarily focused on promoting steel as the material of choice in the automotive and construction markets. Growing these key steel markets also includes continued partnerships with many customer groups, individual companies, governments and organizations. Also, as part of AISI's robust communications, AISI leadership is regularly featured in many prominent news outlets on developments regarding policy, sustainability, and the auto and construction markets.
